Subject: Microsoft Settlement.

Microsoft is responsible for creating millions of jobs.
At a time when our economy is so poor, we need to get companies like
Microsoft back
to work full time and out of the court system. The longer this trial
continues the more our
economy will suffer. Millions of Americans have already lost their jobs,
and millions more
will lose them soon if there is not a spark of hope to ignite the economy
and the consumer
confidence.

People will not spend, if they are in fear of losing their jobs or worst
yet, if they have already
lost their jobs. Let's get on with it and let one of the leading forces of
our economy lead us out of
this recession before it turns into a depression. We do not have anytime to
waste, this case
must be settled immediately. Microsoft and Bill Gates should be given a
medal of honor and the fact that there
has been an antitrust suite brought against them is total ridiculous.

The most important consideration today is getting America back to work,
getting Americans to spend money,
and getting the economy back to normal. There are not many corporation left
that can clearly lead the way
in doing this, but Microsoft can and has done so before. If we waste any
more time, they may lose the
momentum to spark a resurgence and that would be devastating to us all.

A settlement to the states would result in little more than the outcome of
the tobacco settlement. The only
winners were the states who frivolously have spent the settlements on
everything other than what the
money was intended for. Is that the governments intent here too? I implore
you to settle this case so
Microsoft can continue to make the strides it has in the past by creating a
competitive environment with
new technologies which create jobs for us all.

Thank you for your time and consideration.

Respectfully,

Georgie Seitz
